CELLULAR WIRELESS

Use the DKS Cellular Option™ for complete Programming and/or Voice service over the Cellular network! Easy to install and set up with instant access. No more phone lines or ethernet cables to run, and no more trenches to dig! Can be retrofit to existing units.

ETHERNET

Both the DKS 1830 Series and Access Plus Systems now work with most VoIP providers. Easy set up using the DKS Internet Option™, or you can set up the service yourself. VoIP provides reliable voice communication and Programming via your internet connection.

TELEPHONE LINE

POTS (Plain Old Telephone Service) lines provide traditional voice communication, as always. Add Programming (data) for the DKS 1830 and Access Plus Series with the DKS IM Server Modem™ interface.

CONTROL YOUR ENTRY SYSTEM WITH DKS SOFTWARE.

DKS Telephone Entry Software gives you the freedom to work when and where you want. From remote bookkeeping and access, to security control on the ground - and everything in between. You can even receive confirmation so you always know when your transaction is done. Complete turn-key Access Management Solutions.

The DoorKing Software is powerful, flexible, and easy to use, which allows you to easily manage access control in a variety of applications from single access residential to complex gated communities, apartment and condominium buildings, and industrial sites. DKS software is available as free downloads.

DKS 1830s Account Manager Software is for the 1830 Series of Telephone Entry Systems, and the DKS Access Plus Account Manager Software is for the DKS Access Plus Series - both of which are PC compatible.

Software

WHO, WHEN, WHERE.

The DKS 1830 Series of Telephone Entry and Access Control Systems are suited for a wide variety of applications. Simple to use, yet these PC Programmable Systems are sophisticated enough to provide service for up to 3000 users, control up to 16 entry points, and they can store the last 8000 events in their history buffer so you know the “three Ws” of access control: who, when, where. With expanded optional capabilities, you can even add true anti-passback and elevator control.

You can now program online 24/7, giving you the freedom to work when and where you want. From remote bookkeeping and access, to security control on the ground – and everything in between. You even get confirmation to your PC so you always know when your transaction is done. Each 1830 Series unit allows Voice and Data connection over either Cellular, internet, or POTS.

A complete turn-key Access Management Solution, along with a national dealer and support network of more than 4000 strong.

Model 1834
Flush Mount
(shown with trim
ring - sold separately)

Model 1834
Wall Mount

An economical Access Control System with robust features for a variety of applications.

KEY FEATURES:

- Provides both resident and visitor access control into and within apartment and residence hall buildings, gated communities, condominiums, office buildings, factories and industrial sites
- Visitors use the phone system to communicate with a resident who can grant or deny access via their own touch-tone telephone
- Resident access control is provided by means of Cards, Digital PIN Codes, or Wireless Transmitters
- Programming and transaction analysis software available as a free download
- Unlock doors and hold open gates using any DKS app enabled mobile device
- Voice and Data (programming) connection over either Cellular, internet, or copper POTS lines

Model	Phone Numbers (users)	Directory	Entry Codes ¹	Device Codes ²	Door Control	Max Transactions	Elevator Control	Security Levels	Holiday Schedules
1833	3000	No Directory	1000	8000	3 ³	8000 Events	Up to 8 Elevators, 64 Floors per elevator	31	32
1834	3000	Single-line 20 character 1/2" LCD	1000	No	2	8000 Events	No	No	No

1. Four-digit entry codes grant access when entered on the System Keypad only.
2. Five-digit Device Codes refer to Entry Devices (Cards, Clickers, or Keypads) connected to an Access Controller.
3. Expands to 24 entry points with Tracker Expansion Boards.

Modular
DKS design makes installation and service easy

1838 PC PROGRAMMABLE MULTI-DOOR ACCESS CONTROLLER

A SIMPLE LITTLE BOX DELIVERS SO MUCH

Seamless access for even the most complex facilities.

The DKS 1838 Multi-door Access Controller is ideal for small businesses, office buildings, factories, industrial sites, apartment complexes, or for any application that requires access control and reporting capabilities. The 1838 is a 3000 user, 3-door Controller that easily expands to control up to 24 doors with Tracker Expansion Boards.

This flexible System allows access control to 8000 Device Codes by means of Cards, Keypads, Wireless RF Transmitters, or with almost any 26-bit Wiegand Device.

DKS Remote Call Stations can also be added to the 1838 to provide communication from an entry point to a designated phone.

OPTIONS FOR VOICE AND PROGRAMMING

Programmable

Account Manager
Software

Keep access control simple with over 8000 Device Codes, for areas where voice access is unnecessary.

KEY FEATURES:

- Can connect for Voice and Programming by any of these methods: Cellular, Internet, POTS
- Programming and transaction analysis software available as a free download
- Unlock doors and hold open gates using any DKS app enabled mobile device
- Live transactions as they happen (dependent on connection method)
- Share information across other DKS Systems
- Immediate or scheduled data transfers
- Import/Export database in CSV format
- Call Stations provide communication via the telephone network from an entry point to a designated office
- Elevator control is also an available option
- Provide voice communication from an entry point to a designated phone

Model	Phone Numbers (users)	Entry Codes ¹	Device Codes ²	Door Control ³	Max Transactions	Elevator Control
1838	3000	3000	8000	3	8000 Events	Up to 8 Elevators, 64 Floors per elevator

1. Four-digit entry codes grant access when entered on the System Keypad only.
2. Five-digit Device Codes refer to Entry Devices (Cards, Clickers, or Keypads) connected to an Access Controller.
3. Expands to 24 entry points with Tracker Expansion Boards.

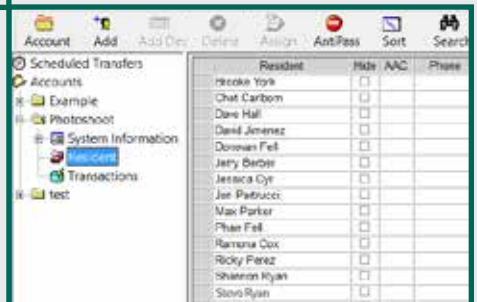

IP Addressable
Easily register online and begin programming right away

Expandable

Database import/export capability

Voice and Remote Programming
Use almost any phone service and retrofit to older DKS units

1830 SERIES TELEPHONE ENTRY EXPANSION

ELEVATOR CONTROL, & ADD ENTRY POINTS

Model 2348
Elevator Control

More doors and elevators? Customize your Access Devices to your space.

The DKS 2348 Elevator Control System provides complete elevator security typically used in high rise condominium, apartment, or office building applications to restrict which floors visitors and building residents have access to.

Model 2358
Tracker Expansion

Model 2358 "Tracker" Expansion Boards are used with Models 1833, 1835, 1837 and 1838 Access Controllers to expand these Systems to control up to 24 entry points.

Wireless Tracker Expansion Boards are used with DKS Models 1833, 1835, 1837 and 1838 to expand these Access Controllers to control up to 24 entry points. Save time, labor and money by connecting Card Readers and Keypads to the 1830 Series Controllers without the need to run wiring from each unit.

Programmable

KEY FEATURES: COMPLETE ELEVATOR SECURITY

- Restricts which floor a visitor has access to
- Programming to restrict residents to certain floors, or grant them access to all floors
- Elevator users must have a valid Access Card to access restricted floors
- Control up to eight elevators, with each elevator serving up to 64 floors
- Call function automatically sends elevator to ground floor when access has been granted

WIRELESS EXPANSION KITS

- Provides a wireless link between Card Readers, Keypads (or almost any 26-bit Wiegand Device) and the 1830 Series Access Controller
- Secure RF Transmission with up to 500 ft (152.4 m) range
- Wireless Boards also act as a repeater, sending information to and from each other and the Access Controller
- Repeater Stations relay information to and from the Controller when greater distances are required
- 16 channels and network IDs
- Adjustable RF signal strength
- Encrypted

TRACKER EXPANSION BOARDS

- Expand capacity as needed, control up to 24 entry points (each Tracker Board controls one entry point)
- Provides power and inputs for almost any 26-bit Wiegand Device
- Request-to-Exit input
- Door Ajar and Forced Entry Alarm outputs
- Hold Open command input
- Also used with DKS Gate Operators to provide Gate Operator data to the Access Control System

Wireless Expansion
can retrofit to existing 1830
Series units

STANDARD & ACCESS PLUS TELEPHONE ENTRY

SINGLE UNIT RESIDENTIAL TO COMMERCIAL MID-SIZE

Access Plus

Standard

STANDARD

The DKS Standard Telephone Intercom Entry Communication and Access Control Devices provide homeowners with two-way voice communication and access control of a door or gate. Suited for residential as well as commercial applications where visitors are easily identified by voice and can be granted or denied access directly from a telephone.

These simple and cost effective Systems are available from the very basic 1819 Information Phone with only a single phone number for direct voice communication, to the more sophisticated 1810 Model which can provide service for up to 600 residents.

1802, 1802-EPD, 1803, 1819, 1808/1810, 1812 Classic and Plus.

ACCESS PLUS

The Access Plus Telephone Entry line offers many of the same features as a full blown Access Control System, but for smaller applications at a much lower cost. These are PC Programmable Systems that are designed for up to 27 users, can control two entry points and are easily expandable to control an additional six entry points.

PC Programming allows you to customize your access control system. After installing the Access Plus Account Manager Software (available as a free download), you can connect to the System via Cellular, internet, or copper telephone wire and begin to customize the System immediately.

Entry points are controlled with Card Readers, Keypads, or RF Controls.

Ideal for residential, small apartment, condominium, gated community and business applications. It can be used as an auto-dialer Telephone Entry System, a "no phone line" Telephone Intercom System, or as a Card Access Control System.

The DKS 1802 Series are an ideal Telephone Entry System that is suited for applications that have limited space and can be used in residential as well as commercial applications. Visitors are easily identified by voice communication and can be granted or denied access directly from a touch-tone telephone.

The 1802 Standard is best suited for applications that do not require a directory, or in applications where a separate directory exists. The DKS 1802-EPD with built-in Electronic Programmable Directory eliminates the need for external or add-on directories.

OPTIONS FOR VOICE ONLY

1802 Standard:

600 phone number memory
Single-line programming display uses super-twist LCD with 5/16-inch (7.9 mm) characters. Indicates door gate has been opened.

1802-EPD:

100 name and number memory capacity
Built-in A-Z scroll buttons and CALL button
Single-line electronic directory uses super-twist LCD with 5/16-inch (7.9 mm) characters

KEY FEATURES:

- Voice only Cellular wireless connection option
- Full-Duplex Communication
- Programmable directory codes (1-4 digits)
- 10 and 11-digit dialing capability
- Two special inputs can be programmed for relay activation or dial-out function
- Built-in clock provides automatic relay activation
- Time zone restrictions on selected entry codes
- Two relays for door/gate control
- Built-in postal lock provision

1812 SERIES TELEPHONE INTERCOM SYSTEMS

THE #1 SELLING TELEPHONE ENTRY

Access Plus

Standard

FROM SIMPLE TO FULLY PROGRAMMABLE

The DKS 1812 Series includes the Classic, Plus, and Access Plus models. Introduced in 1988, the DKS 1812 revolutionized the residential Telephone Entry System market by eliminating the need for a separate telephone line for the entry system. This DKS Telephone Entry line is the best selling single family intercom system, with well over 100,000 units sold to date.

1812 Access Plus Flush Mount **1812 Access Plus** Wall Mount **1812 Access Plus** Surface Mount

The 1812 Access Plus is the top-of-the-line Access Control and Communication System for residential applications. The 1812 is PC Programmable and IP Addressable, allowing Voice and Data connection over either Cellular, internet, or POTS. Connect fast using the DKS plug & play options. With the easy-to-use Access Plus Account Manager Programming Software (available as a free download) you can customize the System immediately, and even program the System and receive reports via the internet. In addition to controlling a main door or gate, the System can be expanded to control up to six additional access points.

OPTIONS FOR VOICE AND PROGRAMMING

Unique communication and access control system allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate.

KEY FEATURES:

- PC Programmable via the Internet, LAN, Modem or direct connection to a PC
- Programming and transaction analysis software available as a free download
- Up to six Access Control Devices (Card Readers, Keypads, RF Controls) can be added to the Access Plus System
- Live relay control from your PC
- 100 Device Codes (Card, Keypad, Transmitter)
- 500 event history buffer
- 10 temporary access codes
- Holiday schedule
- Four Hold Open time zones
- Schedule un-lock/lock times
- Email notifications

IDEAL FOR SINGLE FAMILY & SMALL BUSINESS

The 1812 Series is a unique Telephone Intercom System that allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate without having to pay for an additional telephone line at their home. With its “intercom mode” programming feature, the 1812 can also be connected to a PBX or KSU type system, making it ideal for small businesses to control access through a single door or gate.

OPTIONS FOR VOICE ONLY

KEY FEATURES:

- Allows homeowners to use their telephone as an intercom to speak to a guest at a front door or gate
- Connects directly to existing telephone line with no additional monthly expenses for separate lines from the phone company
- Control two doors or gates via the touch-tone telephone after voice communication is established with guest
- Calls from the 1812 are easily identified with a unique double-ring
- Built-in call waiting feature assures that incoming calls or guest calls are never missed

1816 | 1820 MULTI-LINE TELEPHONE INTERCOM SYSTEM

SEAMLESS INTEGRATION FROM PHONE TO ENTRY POINT

Model 1816

Model 1820

The 1816 and 1820 Telephone Intercom Systems offer outstanding features that allow the resident to be in charge of their calls and can interface with up to 1200 phone lines. Ideally suited for apartment buildings, college resident halls, high rise condominiums, office buildings, and public housing authority projects where controlling access into the building is an essential part of a security program.

KEY FEATURES:

Model 1816

- Full-Duplex communication
- Double-ring feature identifies visitor calls from regular incoming phone calls
- Programmable directory codes
- Interfaces with up to 1200 individual phone lines
- 10 programmed call out numbers (requires central office line)
- Doorman phone input, and built-in call waiting
- No reprogramming of the system is required when one resident moves out and another moves in

Model 1820 - All of the same standard features of the 1816 plus:

- Tenant can call to the Doorman or Concierge
- Programmable call waiting by tenant
- Enable or disable Do Not Disturb feature
- Caller ID identifies entry panel, Doorman, etc.
- Call forwarding is programmable for each tenant

Uses Existing Telephone System

Doesn't require dedicated central office phone line to establish communication

Call Feature

Simple two-button Call Down feature allows for connecting directly to the concierge (1820)

1838 ACCESS PLUS ACCESS CONTROLLER

ACCESS CONTROL WITHOUT VOICE CONTACT

Model 1838
Access Plus

The 1838 Access Plus is ideally suited for small businesses and mixed use buildings where visitor voice communication and Access Control is not a requirement. The 1838 AP can control up to six entry points with Card Readers, Keypads, MicroPlus RF Receivers, or Relay Boards, (allows use of existing 26-bit devices). Additionally, two Auxiliary Relays on the main control board can be activated from the PC to control other devices or access control equipment (a Gate Operator for example).

OPTIONS FOR VOICE AND PROGRAMMING

IP Addressable
Program directly from your PC, software available as a free download

Plug & Play Connection Services
Cellular and VoIP for Voice and Data (remote programming)

KEY FEATURES:

- PC Programmable via Cellular, Internet, or copper POTS lines
- Ideal where visitor voice communication is not a requirement. Tenants do not need central office phone service to be connected.
- Four Hold Open time zones, schedule un-lock/lock times, email notifications, and more
- Control two doors or gates, and add six additional entry points - using Card, Keypad, or Proxy RF Devices

MOUNTING POSTS & KIOSKS

VEHICLE OR PEDESTRIAN

DKS offers a full range of mounting posts, whether it's for vehicular traffic or pedestrian traffic requirements. Architectural and designer style Posts are typically used with the larger Telephone Entry Systems and are available in gooseneck/offset styles for vehicular traffic or straight styles for walk-up pedestrian use. The mounting Kiosks are ideal for walk-up pedestrian applications.

Kiosk 1200-170

Kiosk 1200-160

Kiosk 1200-175

Dual Mount**

Standard Gooseneck

Standard Post

The Standard Posts are used with Card Readers, Keypads, and smaller Access Control Devices; DKS 1808, 1812 Series Telephone Entry and 1504, 1506, 1520, 1524, 1515 Keypads, etc. (adapter plate available to mount DKS 1802, 1802EPD, and 1819 Telephone Entry Systems).

A dual-height style is also available for applications that have both vehicular and truck traffic using the System.

Architectural

Mounting face for full size Telephone Entry Systems: 1830 Series, 1803, 1810.

Small mounting face for Card Readers, keypads and smaller Access Control Devices (adapter plate available to mount DKS 1802, 1802EPD, and 1819 Telephone Entry Systems).

Kiosk

Designed for walk-up pedestrian applications, these Kiosks are for use with flush style DKS Telephone Entry Systems only; 1830 series, 1803, 1810. Ultra-bright energy-saving LEDs illuminate the Entry Systems.

Designer

The Designer Posts have a mounting face for full size Telephone Entry Systems: 1830 series, 1803, 1810. There is also an optional light extension for exceptional illumination.

Both Designer and Kiosk units have a lockable electrical panel on back which holds four Transformers, three Surge Suppressors, and an RF Receiver.

Optional Light Assembly and Light Tower for Designer style

ADD-ON DIRECTORIES

Lighted Model 1710 Surface and Flush Mounts

- Create your own directory print out
- Single-sheet directory easily slips into lighted enclosure
- Number of names on the directory is dependant on type and font size used

Non-lighted Models 1701/1702 Surface Mount

- Provides 1/4-inch slots for resident names to be inserted
- 1701 holds up to 20 names, 1702 up to 60 names

LED LIGHT KITS

Models 1720-080/1720-081

- Easily attach to the top of the Telephone Entry System or add-on directory
- 1720-080 is typically used with Surface Mount Systems. Use with 1803, 1808, 1810, 1833, 1834, 1835, 1837 and 1710 add-on directory
- 1720-081 is typically used with Flush Style Systems or non-lighted directories

MOUNTING KITS

Surface Mount Trim Ring 1803-150

- Standard Surface Mount recess box
- Use with Surface Mount 1803, 1810, 1833, 1834, 1835 and 1837 Telephone Entry Systems

Surface Mount Ring for Flush Units 1814-152

- Surface Mount Ring is used with Flush Mount units to enable a Flush Mount unit to be mounted directly to a flat surface, but not recommended for outdoor use

Flush Mount Kit 1814-165

- Two-part kit; the rough-in box and the trim ring
- Use with Flush Mount 1803, 1810, 1833, 1834, 1835 and 1837 Telephone Entry Systems

Surface Mount Housing 1810-102 (not shown)

- Stainless steel for use with Surface Mount 1810, 1834, 1835 and 1837 Telephone Entry Systems

HEATER KITS

All DKS Heater Kits include built-in thermostats that automatically turns the heater on and off, as needed.

2600-582 for DKS 1802-EPD

- Allows the Telephone Entry System LCD display to maintain normal operation to approximately -20°F (-29°C)

2600-588 for 1812 Models

2600-584 for Telephone Entry Systems

- Heater and thermostat come equipped with mounting magnets, no mounting hardware is required

CCTV CAMERA KITS

Kits can be added to most DKS Telephone Entry Systems. Additional CCTV equipment and cabling required.

1812-145/147 CCTV Camera Kits

- High resolution color camera kits include camera, mounting bracket, wire harness, and power supply

WIRELESS BRIDGE ADAPTERS

Provides a wireless link for data and video when used with the 1830 Series and Access Plus Controllers. These "line-of-sight" units have an operating distance of up to 1000 feet.

Model 1815-510

- One Base Unit; One Remote Unit

Model 1815-511

- One Base Unit; Two Remote Units

Model 1815-512

- One Base Unit; Three Remote Units

WIEGAND CONVERTER

- Converts 26-bit Wiegand data to RS485 data, which allows for the use of almost any 26-bit Wiegand Device with the Access Plus System
- Can also be used to add a relay to the Access Plus System

EXTERNAL SPEAKER

- An external speaker can be added to any Telephone Entry System
- Ideal for use in high-noise areas
